electric mobility devices are not suitable to share road spaces with ordinary vehicles, no matter from the road safety perspective or from the smooth traffic angle. They are also not suitable for use on pavements. Therefore, it is the longstanding policy that electric mobility devices would not be registered or licensed by Transport Department.

In road safety concerns, electric mobility devices are prohibited on roads including footpaths.

Driving an unlicensed vehicle on a road or private road or footpath is liable to conviction for the first time for a fine of $5,000 and to imprisonment for 3 months.
